

THANK YOU FOR CHOOSING A MORLEY® PEDAL.

Please take a few minutes to familiarize yourself with the features of your new pedal. We hope you enjoy using it as much as we enjoyed building it.

WHAT IS A PASSIVE PEDAL?

A passive pedal design means that the pedal does not require a power adapter or a battery to function. Simply plug instrument into IN jack and connect amplifier to OUT jack and you are ready to play! Move treadle to toe up position for off volume, move treadle to toe-down position for full volume. Treadle can be set anywhere in between for just the right volume desired.

ABOUT THE CONNECTIONS:

IN: Input jack. Plug instrument into this jack using 1/4" guitar cable.

OUT: Connect amplifier to this jack using a 1/4" guitar cable.

TWO YEAR WARRANTY

All Morley® pedals are warranted for two years from date of purchase with a copy of your dated purchase receipt. For warranty service, email [tech@morleypedals.com](mailto:tech@morleypedals.com).
